

MAHAAN SHRESTHA

Aspiring SOC Analyst | Defensive Security, Log Analysis and GRC Foundations

Kathmandu, Nepal • +977-XXXXXXX • mahaan.shrestha@email.com • LinkedIn / TryHackMe available on request

PROFESSIONAL SUMMARY

Fourth-semester BSc (Hons) Ethical Hacking and Cyber Security student focused on defensive security. Recently completed Certified SOC Practitioner Fundamentals with a perfect score and GRC Fundamentals with Distinction, along with the ISO/IEC 27001:2022 Information Security Associate certification. Builds on TryHackMe practice, log analysis training and clear documentation habits. Looking for a remote SOC Analyst or Blue Team internship to apply alert triage, evidence review and reporting skills in a real environment.

EDUCATION

BSc (Hons) Ethical Hacking and Cyber Security | Softwarica College of IT & E-Commerce (Coventry University)

Kathmandu, Nepal • 2024 – Present • Fourth Semester • SID: 240417

- Coursework covers networking, Windows and Linux, authorised testing, web technologies and defensive concepts, reinforced through TryHackMe.
- Currently building a home SOC lab using Windows and Linux VMs, Sysmon and Wazuh or Splunk Free, with documented investigation reports.

CERTIFICATIONS

- **Certified SOC Practitioner Fundamentals (SOCP)** | CyberExam | August 2026 | Score: 100/100 | 9/9 tasks
- **GRC Fundamentals, Certified GRC Practitioner** | CyberExam | August 2026 | Score: 54/55 (Distinction)
- **ISO/IEC 27001:2022 Information Security Associate** | SkillFront | August 2026
- **Foundations of Log Analysis for Cyber Defense** | Red Team Leaders | June 2026
- **Certified LLM Security Professional (CLLMSP)** | Red Team Leaders | June 2026
- **TryHackMe Pre-Security Learning Path** | Completed May 2025 | Badges: Networking Nerd, cat linux.txt, World Wide Web, Webbed, Intro to Security Engineering
- **(ISC)² Certified in Cybersecurity (CC)** | Coursework completed, exam preparation in progress

TECHNICAL SKILLS

SOC and Defensive: Log analysis, alert triage, MITRE ATT&CK awareness, incident documentation, evidence collection

Systems and Networking: Windows and Linux fundamentals, TCP/IP, DNS, packet analysis concepts

Tools: TryHackMe, Wireshark, Nmap, Burp Suite, OWASP ZAP, Cisco Packet Tracer, basic Python and Git

GRC Foundations: ISO/IEC 27001 awareness, risk concepts, policy fundamentals, compliance frameworks

RELEVANT PROJECTS AND CONTROLLED LABS

- **DNS Spoofing Demonstration:** Studied redirection risk, indicators, secure DNS controls and monitoring in an isolated lab.
- **Keylogger Demonstration:** Evaluated keystroke capture behaviour, endpoint indicators and defensive controls.
- **Phishing Link Analysis:** Practised URL inspection, user awareness indicators and incident reporting approach.
- **Steganography Demonstration:** Explored concealment and detection methods with a defensive focus.
- **Full Stack Website:** Built front end and back end with authentication and considered secure development practices.

ADDITIONAL INFORMATION

- **Languages:** English (professional) • Nepali (native)
- **Strengths:** Consistent self directed learning, attention to detail, structured documentation, ethical isolated lab practice
- **Current Focus:** Investigation portfolio, (ISC)² CC exam, deeper SIEM practice with Wazuh or Splunk Free
- **Availability:** Fully remote • Flexible across time zones • Ready for a structured 8 week programme
